

Outdoor Den for a Teddy

Can you create your very own outdoor den or tipi for your favourite toy or teddy?

You will need to:

1. Gather some materials – twigs, sticks, leaves, grass
2. Decide on the structure for your den – a tipi works well by binding three sticks together in a tripod shape.

3. Use the grass, leaves, smaller twigs and sticks to cover the tripod structure.
4. Put your teddy inside and send Mrs Ward a photograph of your finished design through your class email to go on the website.
